

DISEASE IN THE HERD

Tuberculosis-Infected Cattle Discovered in Goshen, N. Y.

One Cow Had Been Killed and Sold as Beef in This City.

Milk Sent to Various Points and Great Danger Exists.

Sanitary Supt. Dr. Roberts, of the Board of Health, sent a communication to the State Board of Health today notifying that body of the discovery that a herd of cattle infected with tuberculosis had been shipped from Goshen, N. Y., to various points, and is likely to spread the disease.

A week ago yesterday, Meat Inspector Romaine seized four quarters of beef which had been shipped to West Washington Market, this city, from Goshen. The meat was found to be infected with tuberculosis, and was pronounced to be the worst that had ever come under the notice of the Board of Health.

Inspectors will at once set at work to trace if possible the herd from which the beef came. It was found that the diseased meat had been shipped by Ira H. Smith, a Goshen dairyman, and by Samuel K. Johnson, a veterinarian, to the Board of Health, was sent to make an examination of the herd. His report was submitted to the Board of Health, and the whole herd was likely to become infected.

The milk from this herd is distributed at various localities, but the major portion of it is sent to Middletown, N. Y., where it is condensed, put up in sealed cans and shipped to New York, where it is put on sale and most of it is consumed.

Mr. Smith, when questioned by Dr. Johnson as to the source of the milk, stated that the cow had an injured leg and was unsuitable as a milk producer.

He denied that he knew the cow was afflicted with tuberculosis, but admitted that he had been in the dairy business a number of years and had seen many cases of tuberculosis.

The Board of Health, however, declares that Mr. Smith must have known that the cow was infected with tuberculosis, and that the meat was unfit for consumption.

The whole herd, Dr. Roberts thinks, will undoubtedly be condemned and slaughtered by the State Board of Health, the members of which are fully alive to the dangers arising to public health from such sources.

Dr. Roberts has not made up his mind whether or not to prosecute Smith, but declares that whatever the determination of the Board of Health might be in this particular instance, the next person whom it could be found guilty of selling diseased meat or milk to New York would be prosecuted to the full extent of the law.

BRAZIL AND PORTUGAL.

A Lisbon Correspondent Thinks Their Trouble Will Be Settled.

(By Associated Press.) LONDON, May 15.—A despatch to the Times from Lisbon today says that while the reason alleged for the rupture of diplomatic relations between Brazil and Portugal is the conduct of the commanders of the Portuguese warships Mindeiro and Alfonso de Albuquerque in allowing the insurgents to escape from their ships at Montevideo, Portugal is entirely blameless in the matter, and has done her utmost to satisfy Brazil by dismissing the commanders referred to.

The correspondent adds that, although the position is considered serious, it is believed that the question will be amicably settled, Portugal has already maintained and desires to maintain the most friendly relations with Brazil.

TROUBLE FEARED IN SERBIA.

Radicals Will Hold Meetings Despite Government Prohibition.

(By Associated Press.) LONDON, May 15.—The correspondent of The Chronicle at Vienna says that a popular rising is feared in Serbia. Great excitement prevails among the people, who are indignant at the arbitrary act of the Government in prohibiting proposed meetings. The Government has issued a proclamation in power of King Milan, such meetings would not be allowed, declared that troops would be used to prevent them. The radicals, however, declare they will be prepared to offer resistance to any troops sent to disperse them, and conflicts are then expected.

MOUNET-SULLY ILL.

The French Actor's Condition Said to Be Serious.

(By Associated Press.) PARIS, May 15.—The actor, Mounet-Sully, who recently appeared in New York, is seriously ill.

DR. JAMAL RETIRES.

His Term as House Surgeon of Governor Has Expired.

Dr. M. K. Jamal retired today from the post of house surgeon of Governor Hoffman. He had been in sole charge for the past six months. His retirement has been made in the service of his private practice. The clinic has been so arranged that hundreds of the poor have been treated. The patients are found in the hall of the building. His office has been appropriated by the authorities, and he has been named as the director of the new hospital. His retirement has been made in the service of his private practice. The clinic has been so arranged that hundreds of the poor have been treated. The patients are found in the hall of the building. His office has been appropriated by the authorities, and he has been named as the director of the new hospital.

POISONED BY VACCINE.

Fort Wayne Boy Killed and Many Made Ill by Impure Virus.

(By Associated Press.) FORT WAYNE, Ind., May 15.—Frank Madden, seven years old, is dead from the effects of vaccination. Thirty persons here are critically ill from being vaccinated with impure virus. In many cases erysipelas and blood poisoning have resulted. The Board of Health has ordered for immediate vaccination has been directed to public health here.

A Candid Opinion.

(From Tid-Bits.) At an evening party Dumley was introduced to a young lady, and, after a remark about the weather, he said, gallantly:

"And have I really the pleasure of meeting the beautiful Miss Blossom whose graces are being sounded by everybody?"

"Oh, no, Mr. Dumley," the lady replied, "the beautiful Miss Blossom to whom you refer is a cousin of mine."

"Oh, that's it. I thought there must be a mistake somewhere," said the gallant Dumley.

STOLEN TRAIN RECAPTURED.

Seized by Wyoming 'Wealers, Who Drive Off a Marshal's Men.

Cars Abandoned at Green River, Where Coxeyites Camp.

(By Associated Press.)

GREEN RIVER, Wyo., May 15.—When Marshal Pinkham, of Idaho, started to board his train to go to Cokeville for the Coxeyites, who had seized the train, he was met by a large number of men, who drove off his men. The train was abandoned at Green River, where Coxeyites camp. The Coxeyites took Pinkham's train and started back.

On advice of President Clark it was decided here not to risk destruction of the Union Pacific Railroad Company's property in an attempt to check the Coxeyites' train, and the project to block the Green River bridge with loaded cars and engines was abandoned. When the train arrived here with 300 industrialists aboard at 11 A. M. Marshal Rankin, with twenty well-armed deputies, was waiting for them.

As soon as the train stopped Trainmaster Hay jumped on the engine and ran it to the round-house. The Coxeyites left the cars and have gone into camp. Fires will be drawn from all engines and the industrialists kept here.

The greatest excitement prevails at Montpelier, many citizens sympathizing with the Coxeyites, among them the notable Dick Williams, who was arrested.

The Coxeyites attempted to release him, but were driven off by three dozen Winchester rifles in the hands of deputies. A public meeting of citizens was held to confer with the Coxeyites, but the marshals could do nothing as their duty was imperative.

Mr. Smith, when questioned by Dr. Johnson as to the source of the milk, stated that the cow had an injured leg and was unsuitable as a milk producer.

He denied that he knew the cow was afflicted with tuberculosis, but admitted that he had been in the dairy business a number of years and had seen many cases of tuberculosis.

The Board of Health, however, declares that Mr. Smith must have known that the cow was infected with tuberculosis, and that the meat was unfit for consumption.

The whole herd, Dr. Roberts thinks, will undoubtedly be condemned and slaughtered by the State Board of Health, the members of which are fully alive to the dangers arising to public health from such sources.

Dr. Roberts has not made up his mind whether or not to prosecute Smith, but declares that whatever the determination of the Board of Health might be in this particular instance, the next person whom it could be found guilty of selling diseased meat or milk to New York would be prosecuted to the full extent of the law.

MINERS CONFERENCE.

Fears that Its Session Will

Amount to Nothing.

CLEVELAND, May 15.—The consensus of opinion among miners and operators today before the conference met was that the result of the meeting would be nothing.

The conference, which was first announced to be held in the Chamber of Commerce, will begin at 2 o'clock in Case Hall. The Scale Committee of miners met in Bank Street Hall at 10 o'clock, and the operators assembled in conference in the Weddell House at 11 o'clock.

The Illinois operators and a part of the Pittsburgh district are not represented in the conference, so whatever terms, if any, may be agreed upon, must be ratified by the absentees before they become effective. Therefore a contingent clause will be the only thing that will prevent the conference being an utter failure. The miners' union is to be firmly united for the mutual interest of all.

One source of one of the miners' union says their motto is and will continue to be, "one for all and all for one."

BARNEY PERSUADED TO BUY

He Says Villard & Co. Said R. F.

and C. C. Was a Good Thing.

But After the Purchase He Found

Out Differently.

Director Charles T. Barney, of the

Northern Pacific, was again a witness

today before Special Master Alfred L.

Cary, who is investigating the Villard

management of that company, and es-

pecially the deal by which the Chicago

terminals were secured in 1890.

One of the properties purchased by the

Northern Pacific was the Rocky Fork

and Clark City Railroad Company.

Mr. Barney said he had purchased 40

certificates of this company in January,

1890. He did this against his judgment,

but he said he was persuaded to buy

the stock by Mr. Villard and other

officers of Northern Pacific, who insis-

ted that it would be a good thing for

the company to acquire that property.

He added that it was represented to

him that the contract with the Rocky

Fork and Clark City as a coal feeder would

save the Northern Pacific from \$20,000

to \$30,000 annually.

This saving, it appeared, was to be a
